

The FDP Suppressor combines cutting-edge engineering with user-focused features. Designed for fast attachment and removal, it eliminates the need for a threaded barrel, using patented adapters to attach to pistols equipped with accessory rails.

The suppressor does not affect the normal cycling of the pistol and has minimal to no point-of-impact shift between suppressed and unsuppressed, ensuring accuracy and reliability. Its modular construction allows for effortless cleaning and customization with various host adapters, and its performance rivals traditional suppressors in sound suppression. The FDP Suppressor's sleek design ensures it does not obstruct sight lines, providing a seamless shooting experience for enthusiasts and professionals alike.

This new modular design has been reviewed and approved by the BATFE Firearms and Ammunition Technology Division (FATD) as of December 2024.

### Specifications

**Caliber**  
9mm

**Length**  
6.45" (164 mm)

**Width**  
1.0" (25 mm)

**Weight (w/o mount)**  
11 oz (311 g)

**Construction**  
Aluminum

**Colors Available**  
Black ■

By attaching to the pistol's frame, the FDP suppressor does NOT require a threaded barrel, nor a Nielsen Device/Booster assembly. The patented attachment system does not require a booster adapter since the host pistol operation is not changed. This also maximizes ammunition compatibility, allowing supersonic and subsonic loads to be used.

The FDP Suppressor is modular by design, allowing for users to have multiple adapters to fit the FDP to your favorite pistol. Check the website regularly for new adapters as they are released.

Adapters available at launch:

- Glock 17, Gen 5
- Glock 17, Gen 3/4
- Glock 19, Gen 5 (also fits, Glock 45, 19X)
- Glock 19, Gen 3/4
- HK VP9

The FDP suppressor utilizes a baffle system unlike any other. Internal to the suppressor are baffle plates, which effectively reduce the sound of the pistol firing. These plates are easy to remove for cleaning, even when dirty.

With the uniquely shape of the FDP, pistol iron sights and red dot sights are not obscured. Additionally, the shape is approximate to an AR-15 magazine, allowing stowage in magazine pouches.

Adapters for the FDP feature an integrated M1913 Picatinny rail section that allows for the attachment of lights, lasers or other accessories.

Since the suppressor attaches to the rail of a pistol, it attaches and removes faster than the time it takes to read this.
